PROJECTS

PokedexRL

Jun 2024 - Sep 2024

A AI object scanner, which scans any object and gives us the details about the project. It was inspired from "pokedex" seen in Pokemon. It was implemented using AstraDb, gpt4o, and Nextjs majorly. We also reached the finals of our college first project expo with this project.

[CountDown Page ↗](#)

Aug 2023 - Sep 2023

Countdown Notification Page A simple web page built with HTML, CSS, JavaScript, and PHP that displays countdown timers and collects email addresses to notify users when the countdown ends.
